

PROBLEM SOLVER

PROBLEM:

Grinding and finishing work often requires multiple abrasive wheels to finish the job.

- More time is wasted changing disks.
- More inventory is consumed by different types of disks.
- Standard wheels don't work well on round or odd-shaped objects.

BLUE-KOTE™
A LAWSON PRODUCTS BRAND

SOLUTION:

Blue-Kote™ Flap Discs

- One disc grinds and finishes, meaning less inventory and less time spent changing equipment.
- Lasts up to 25 times longer than resin fiber discs due to cleaner, cooler, and faster cuts.
- Flap discs incorporate zirconium cloth for excellent grinding, combined with smooth, scratch-free finishing.
- Soft phenolic backing allows disc distortion during grinding and finishing, making easy work of round or odd-shaped surface.

APPLICATIONS:

- Fleet Maintenance
- Maintenance welders and fabricators
- Machine, tool, and die shops

INDUSTRIES:

- Agriculture
- Automotive
- Construction
- Education
- Equipment rental
- Government
- Hospitality
- Manufacturing
- Mining
- Oil and Gas, Refineries
- Property Management
- Transportation
