

PROBLEM SOLVER

PROBLEM:

There are too many OE replacement kits needed to service all vehicles on the market.

This Causes:

- More money to be spent on a larger inventory.
- More time is spent on complicated technician training.

SOLUTION:

Universal TPMS Service Kits – A 2-part kit that works on 94% of vehicles.

- Reduces inventory and dead stock.
- Simplifies the product for faster training.
- Mitigates lost sales by always having the right kit available.

APPLICATIONS:

- For most metal valve stems, use the U1 Kit (1583638)
- For most rubber snap-in valves, use the U2 kit (1583639)

INDUSTRIES:

- Automotive

Remove the sensor

Remove the old stem components

Reinstall the sensor with new components
