

## 1/4" Right Angle Die Grinder

The perfect configuration to provide easy access to tight spots so you can, grind, break sharp edges, de-burr, port, and polish virtually anywhere. Plus, it features a soft cushion ergonomic grip and a built-in speed regulator for ultimate control and comfort. Whether you're deburring, blending, or buffing, our lightweight composite body grinder is the perfect tool for all your grinding needs.

- Composite housing is lightweight and reduces frost build-up when the tool is in use
- Safety throttle lever keeps the tool from misfiring when not in use

# PNEUMATIC TOOLS – Cut-Off Air Tools

## 3" Pneumatic Cut-Off Tool – Front Cut

This pneumatic cut-off tool boasts a powerful motor and precision engineering that's perfect for cutting through a wide variety of materials with ease. Uniquely created with a front-cut design that allows for a straighter, more consistent cut. This professional-grade tool has a comfortable and easy-to-use grip, ensuring you'll be able to tackle any cutting task confidently.

- Adjustable 360-degree steel guard
- Safety throttle lever keeps the tool from misfiring when not in use

# PNEUMATIC TOOLS – Impact Wrenches

## Stubby Impact Wrenches

These pneumatic impact wrenches combine hammer-like impact force and wrench rotational force to tackle even the most stubborn or stuck fasteners. The stubby, compact design allows for easier use in tight or hard-to-reach places. These tools are designed with a well-balanced and lightweight body for comfortable one-handed operation, making it the perfect choice for extended run times. The twin hammer mechanism provides heavy-duty performance and reliability, while the ergonomic rubber grip handle reduces hand fatigue and increases operator comfort and control.

# PNEUMATIC TOOLS – Air Ratchets and Air Screwdrivers

## Air Ratchet Wrenches

These pneumatic air ratchets are a versatile tool that can speed up tasks, reduce worker fatigue, and make it easier to work in tight spaces. They turn fasteners in small increments without repositioning the tool and provide tighter clearance than larger impact tools.

- Composite housing is lightweight and reduces frost build-up when the tool is in use
- Unique ratchet head design that extends usage life and lubrication port

# PNEUMATIC TOOLS – Grinder and Sanders

## 5" High Speed Air Grinder

This pneumatic high-speed air grinder is the perfect tool for precision grinding and polishing. Designed for professional use, this air grinder boasts a lightweight, ergonomic design that makes it easy to handle and control with precision. With its high-speed rotation, it can effortlessly grind and polish even the toughest materials, leaving them smooth and polished to perfection.

- Air regulator helps adjust airflow intake
- Composite housing is lightweight and reduces frost build-up when the tool is in use
- Improved muffler design for reduced noise

These versatile pneumatic orbital palm sanders deliver high-speed sanding with precision, making them ideal for sanding, smoothing, and shaping surfaces. With their durable construction and powerful motor, these sanders can handle even the toughest sanding jobs with ease. Standard, central vacuum, and self-generated vacuum options are available.

- Air motor is suspended by vibration absorption rubbering resulting in low vibration
- Muffling system reduces noise level to 80 dB
- Innovative seal system design which insulates the air motor and bearing from sanding residue and contamination
- Anti-dust protection improves tool longevity
- Dual vacuum shroud provides extra pick up around the edges of the sanding pad

# PNEUMATIC TOOLS – Air Tool and Air Saw

## Oscillating Air Tool

This oscillating air tool can easily cut, scrape, and sand any surface, making it a must-have for all professional MRO projects. With its spindle and blade arbor design that provides multiple forward positions for added versatility, this tool is perfect for accessing hard-to-reach areas and achieving a smooth finish. The soft-touch finish on this tool also provides improved comfort and control, allowing you to work for longer periods without experiencing hand fatigue.

- 2-in-1: Able to use standard oscillating tool blades and cutters
- Composite housing is lightweight and reduces frost build-up when tool is in use

## Air Saw

This pneumatic reciprocating air saw contains a powerful motor and versatile blade arbor design that accepts standard reciprocating saw blades. The saw cuts through aluminum, plastics, fiberglass, and sheet metal. Its ergonomic grip creates fast, precise cuts, and its adjustable shoe ensures precise cutting depth to increase blade life.

- Quick change feature allows for toolless change of blades
- Bi-metal saw blades and bi-metal scroll air saw blades can be attached
- Low vibration front housing reduces user fatigue

## Air Nibbler

This air nibbler is a powerful, handheld tool that effortlessly cuts through sheet metal, aluminum, and other tough materials with precision and ease. Its unique design allows for smooth, clean cuts that are free from distortions and warping, making it the go-to tool for professional metalworkers. With its ergonomic grip and lightweight construction, easy to handle and maneuver, even in tight spaces.

- Adjustable anvil for the ability to cut forward, backward, left, and right
- Tool can cut aluminum, brass, fiberglass, and masonite
- Tool was designed with the capability of cutting 16-gauge; 0.62"; 1.5mm mild steel sheet

# PNEUMATIC TOOLS – Air Hammers

## Air Hammers

These pneumatic air hammers are a powerful tool that delivers rapid, repetitive blows to efficiently remove unwanted material, creating precise shapes and cuts. It is commonly used in construction, automotive repair, and metalworking applications to break or shape hard materials such as metal, concrete, and stone. Its ergonomic design and lightweight aluminum construction make it easy to handle, while its durable construction ensures reliable performance even under heavy use.

- Retainer spring accepts standard 0.401" shank chisels
- Aluminum housing provides a lightweight die-cast
- Teasing trigger is comfortable to operate and control
- Built-in regulator for speed adjustment
- Kits Contain: Bare tool, flat chisel, tapered punch, panel cutter, single-cut panel cutter, and a spot weld breaker

## Low Vibration Air Hammers

These pneumatic air hammers are a powerful tool that delivers a high-velocity hammering action to efficiently remove unwanted material, creating precise shapes and cuts. The low vibration provides additional stability when working in sensitive environments. Its ergonomic design and lightweight construction make it easy to handle, while its durable construction ensures reliable performance even under heavy use.

- Damping system for increased efficiency in hammering
- Active air spring design reduces the vibration of the air hammer
- Quick change feature allows for toolless change of chisels
